Parental Pain Study

The study looks at how
parents with chronic pain
and their children
experience pain.

For
Patients of QEII
with Children

This study has been approved by the IWK Health
Centre Research Ethics Board.

**Parents with chronic pain
and their children**
needed for a one-visit research study.

Patients of the QEII Pain
Management Unit who have
experienced chronic pain for at
least 6 months, and have a child
between the ages of 8-15.

Both you and your child will
complete a number of
questionnaires. Your child will
perform the "hand in cold
water" task.

You and your child will each
receive \$20 gift cards plus
compensation for travel
expenses. Participation takes
approximately 90 mins.
